

Stellar Wall

<https://stellarwall.xyz/>

Who we are?

STELLAR WALL is a
100x100 pixels online billboard
that offers a new opportunity to
advertise your projects!

Mission and goals

With **Stellar Wall** our aim is to offer a space where people can advertise anything (NFT collections, assets, projects...) by showing any picture on their pixels.

We want to create a place where we can interact and learn about all the active projects in the Stellar Network!

1,000

New expected users
for Q1 2023

- Create a place where we can find active projects on Stellar Network.
- Appear on the Stellar Network projects page.
- Create profitability for users and support them in the diffusion of their projects and new releases.

What is Stellar Wall?

Stellar Wall is an online Billboard made of 10K pixels where people can advertise their projects by showing a picture on their pixel/s. *Check the “How to buy” steps below to learn how to get your first pixel/s*

What is the Number of pixels?

10,000 pixels

What can you do with your pixels?

Once you own a pixel/s you can link forever what you desire on the blockchain simply by uploading a picture on your pixel/s. You can also write a title & short description that will appear to users when they hover on the pixel. If the visitors click on the pixel, they will be directed to the link which owners provide to StellarWall.

What can you link to your pixel/s?

You are free to connect what you desire! Projects, NFTs, blogs, web... (remember that any offensive content will not be allowed)

What is the price of each pixel?

For the Launch Sale the first 500 pixels are sold at the price of 30 XLM for pixel

Which image format can you upload?

JPG and PNG

How can you make a profit with Stellar Wall pixels?

Owning a pixel in a strategic position can increase its value, also the users in Stellar Wall will grow in time and your project will gain more visibility and profit!

FUTURE PROJECT RENTABILITY: pixels work as NFTs that users can rent and sell to make profit

How to buy?

Step 1:

Go to the pixel map and select the pixels that haven't been bought out yet. The minimum size to buy is 1 pixel. Choose a bigger plot size/pixel size for a better view of your uploaded picture or NFT. You can choose up to 10x10 pixels at once. To select a group of pixels click on the first one, hold for a second, then drag to select the whole group.

Step 2:

Upload your desired picture or NFT from your device storage. Your picture will be resized in the shape of your chosen pixel/plot shape. Insert a link in the next field. The link can redirect to any social media, video and website. It can redirect the user/clicker to any site you want. But if you embed any phishing or malicious links, your picture will not be linked.

Step 3:

Enter your Email, Discord ID and Telegram ID on the respective fields. Remember, you must not lose access to your email, you'll receive an automated confirmation via email, as well as the team will contact you via that email.

Step 4:

You'll be given a Stellar Public Address to send the payment for buying the Pixel Plot. The price will depend on the blocks you choose. Send the correct amount to the given address. After sending, paste down your Stellar Public Address on the next tab for double safety. Your submitted picture and link will be added to the pixel map within 24 hours after it passes the NSFW and verification checks.
